SUMMARY

Results-driven AI Engineer with 4+ years of experience designing, developing, and deploying machine learning and generative AI applications. Skilled in building scalable AI solutions using Python, PyTorch, TensorFlow, and cloud technologies. Experienced in developing LLM-powered applications, Retrieval-Augmented Generation (RAG) systems, MLOps pipelines, and computer vision solutions. Passionate about transforming business problems into intelligent, production-ready AI systems.

EDUCATION

National Institute of Technology Karnataka (NITK)

Master of Technology (M.Tech.) in Artificial Intelligence, CGPA: 9.18 / 10 2020

Government Engineering College, Thrissur

Bachelor of Technology (B.Tech.) in Computer Science and Engineering, CGPA: 8.72 / 10 2018

EXPERIENCE

AI Engineer

Nexa Intelligence Solutions Pvt. Ltd.

July 2022 – Present

Bengaluru, India

Key Technologies: Python, PyTorch, LangChain, FastAPI, Docker, AWS, Pinecone, PostgreSQL

- Built enterprise-grade RAG chatbot using LangChain and OpenAI APIs, reducing customer support workload by 42%.
- Developed document intelligence platform capable of extracting information from invoices, contracts, and reports using OCR and LLMs.
- Fine-tuned open-source LLMs for domain-specific question answering, improving response accuracy by 24%.
- Designed scalable FastAPI microservices for AI inference.
- Implemented CI/CD pipelines for ML model deployment using Docker and GitHub Actions.
- Optimized GPU inference pipelines resulting in 38% lower latency.
- Collaborated with product managers and data engineers to deliver AI-powered SaaS products.

Machine Learning Engineer

Vertex Analytics Labs

June 2020 – June 2022

Bengaluru, India

Key Technologies: Python, TensorFlow, Scikit-learn, MLflow, Airflow, AWS

- Developed predictive analytics models for retail demand forecasting.
- Built recommendation engine increasing customer engagement by 18%.
- Created image classification pipeline using CNN architectures.
- Automated model retraining workflows with MLflow.
- Performed feature engineering and model evaluation on datasets exceeding 20 million records.

PROJECTS

AI Research Assistant | Technologies: Python, LangChain, FAISS, OpenAI API, FastAPI

- Developed an LLM-powered research assistant capable of answering questions from uploaded PDFs.
- Implemented semantic search using embeddings and vector databases.
- Integrated citation-aware responses.

Smart Medical Image Analyzer | Technologies: PyTorch, OpenCV, FastAPI, Docker

- Built a deep learning system to classify chest X-rays.
- Achieved 95.3% validation accuracy.
- Deployed REST API for hospital integration.

Multilingual Voice Assistant | Technologies: Whisper, Hugging Face Transformers, FastAPI

- Developed an AI voice assistant supporting English, Hindi, and Malayalam.
- Integrated speech recognition, translation, and text-to-speech modules.

TECHNICAL SKILLS

Python

SQL

Java

JavaScript

Deep Learning

Machine Learning

Natural Language Processing (NLP)

Computer Vision

Reinforcement Learning

Large Language Models (LLMs)

Prompt Engineering

Fine-tuning

Retrieval-Augmented Generation (RAG)

PyTorch

TensorFlow

Scikit-learn

Technical Documentation

CERTIFICATIONS

AWS Certified Machine Learning – Specialty
TensorFlow Developer Certificate
Microsoft Azure AI Engineer Associate
Deep Learning Specialization
Generative AI with Large Language Models

PUBLICATIONS

Efficient Retrieval-Augmented Generation for Enterprise Knowledge Systems — International Conference on Artificial Intelligence Applications (ICAIA), 2023

ACHIEVEMENTS

Led AI initiatives that reduced operational costs by 30%. Winner of the 2023 AI Innovation Hackathon at Nexa Intelligence Solutions. Mentored 10 junior engineers in MLOps and Generative AI development. Speaker at regional AI developer meetups on LLM deployment strategies.
